Research Assignment

- Write a research paper about one of the following file systems (500+ words)

    - ReiserFS, EXT4, XFS, or BTRFS

- Be sure to include:

    - Architecture or structure of the file system

    - Benefits and drawbacks of the file system

    - Tools used to administer the file system

- Make sure to site all references and use proper research paper form (APA)

- You can only use good sources like RFC documents and academic papers, no WIKIPEDIA

- Due in week 5

- +10 points on your final grade

- Must be on paper, no email!
